BNAM Flyer Biscuit Line EN 1026 Z&B 263752

Bühler Services Agreements

Biscuit Line

One partner for your entire biscuit line — inspected, maintained, and running.

A Bühler Services Agreement (BSA) places your biscuit line under one proactive inspection and maintenance program, delivered by Bühler service engineers who know your equipment.

This services agreement includes:

- Inspection and cleaning of key production equipment
- Lubrication of bearings, chains, gears, and moving parts
- Adjustment and alignment of rollers, belts, conveyors, and mechanical assemblies
- Inspection and replacement of worn components, seals, filters, and bearings as needed
- Maintenance of pneumatic, electrical, and sensor systems
- Inspection and restoration of safety components
- Functional testing after maintenance

Every critical machine receives an annual inspection and maintenance service planned around your shutdown schedule. This helps catch wear before it causes unplanned stoppages or affects product quality and food safety. Coverage is tailored to your Bühler equipment across forming, baking, and cooling.

Benefits

- Increased product quality and yield
- Consistent production performance
- Reduced operating costs
- Fixed, predictable service costs
- Reduced equipment downtime
- Bühler expertise
