

1. Purpose

This specification establishes the standards for the identification label for electrical modules.

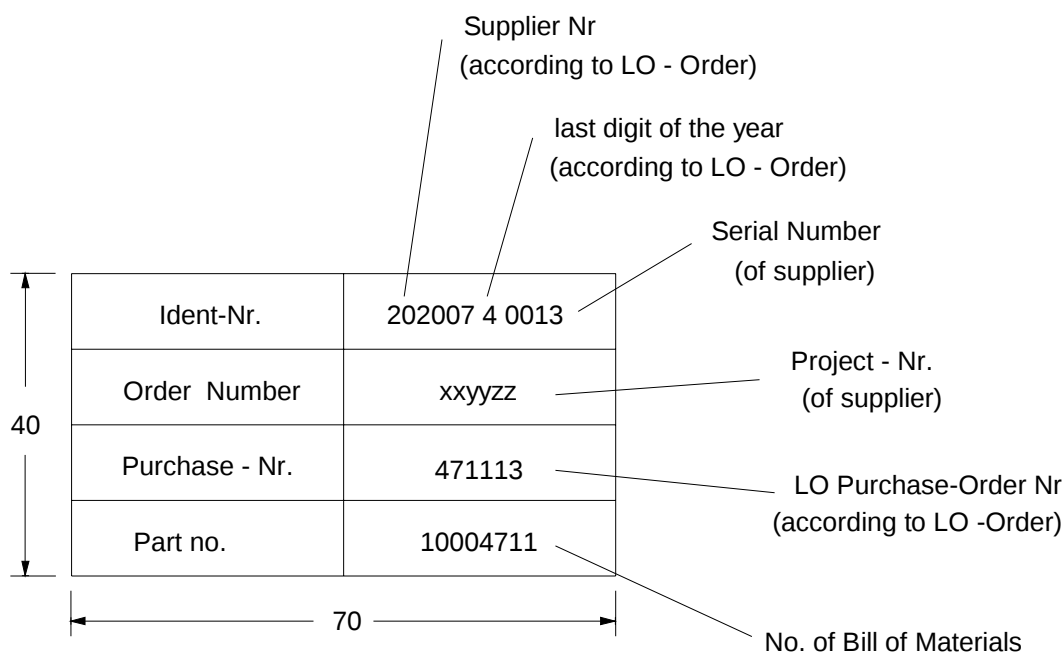

2. Application

The specification is valid for all electrical modules that are designed by Bühler Alzenau or manufactured according to Bühler Alzenau drawings.

3. Description of the Identification Label

Self-adhesive, BLOA part no. 10029874

The identification label is filled in by the module manufacturer/supplier.

4. Location of the Identification Label on a Module

The identification label is attached to an integral part of the module i.e. a part that cannot be detached from the module (e.g. for an electrical cabinet - viewed from the front: the identification label is placed on the top, right-hand side crossbar of its frame).

5. Note

The identification label is on stock at the supplier and is not listed in the BLOA Bill of materials.
