

Plant to Plate Workshop 2026

Unveiling the Plant
Protein Journey

Plant to Plate Workshop

Unveiling the Plant Protein Journey

Uzwil, Switzerland

The plant-based food markets are growing rapidly. New technology opens the door for producers to create and offer new products to customers and consumers. This development provides exciting possibilities for businesses to expand their portfolios, access new customer groups, and drive future growth. Identifying emerging trends, discovering new product ideas, and positioning your company to succeed in this dynamic segment is key to future growth.

Course content

The future of food

- Changes and development of global food production
- Market insights and trends for the plant-based dairy and meat markets
- Business cases along the plant-based food value chains for dairy, meat, and fish
- Valorizing side streams
