

Conveyor Drying Workshop

2026

Theory put to practice

Conveyor Drying Theory Put to Practice Workshop.

Uzwil, Switzerland

This 3-day course will start with the basics of drying theory and increase in complexity to expand your knowledge of conveyor drying. This is accomplished through a combination of focused lectures and several hand-on laboratory sessions at our Application Center in Uzwil, Switzerland.

This seminar will provide practical, applicable knowledge you will need to get the most out of your drying process.

Why this course is important

Most conveyor convection dryers are operating at 10% – 30% below their potential efficiency. Even in smaller production lines, this is a major source of lost revenue.

Course content

- Dryer basics, applications and troubleshooting
- Controls and instrumentation
- Mechanical and Process evaluation techniques
- Dryer Economics
- Energy recovery
- Digital services
- Laboratory sessions
- Tour through factory, application center and CUBIC Innovation Center

Target group

Everyone who can benefit from this course, e.g. maintenance, process and quality engineers, etc.
