

RotaMold Smart Rotary molder

Designed for customer success

The **RotaMold Smart** is engineered to mold your products with precision and efficiency. Built for simplicity in operation, it offers flexibility and performance, all combined in one rotary molder.

Introducing the **RotaMold Smart**: molded excellence and precision, fully designed, engineered, and manufactured in China to streamline your production.

The RotaMold Smart is not only about efficiency; it is about performance. Handles a vast range of biscuits, from buttery to low-fat, with guaranteed high weight accuracy, backed by recipe-controlled settings. Enjoy a seamless production flow with adjustable speeds, thanks to independently controlled drives and rollers, supporting a running speed of up to 30m/min. All adjustments needed for the perfect product shape are conveniently within reach, making the RotaMold Smart the ultimate solution for your versatile and reliable molding needs!
