Pelleting Essential

Smart pelleting dashboard | Digital service

Improve pelleting efficiency

The Pelleting Essential digital service provides full visibility over the pelleting process. With powerful analytics and access to historical data, it gives you the insights you need to enhance the performance of your pelleting line.

Features:

Overview of pelleting performance

Event analysis

Production table

Optional: OEE tracking and continuous improvement with Companion Plus mobile app.

Benefits:

Enhanced operational efficiency including OEE: Pelleting Essential boosts productivity by improving plant performance, stabilizing production processes, while reducing operating and energy costs.

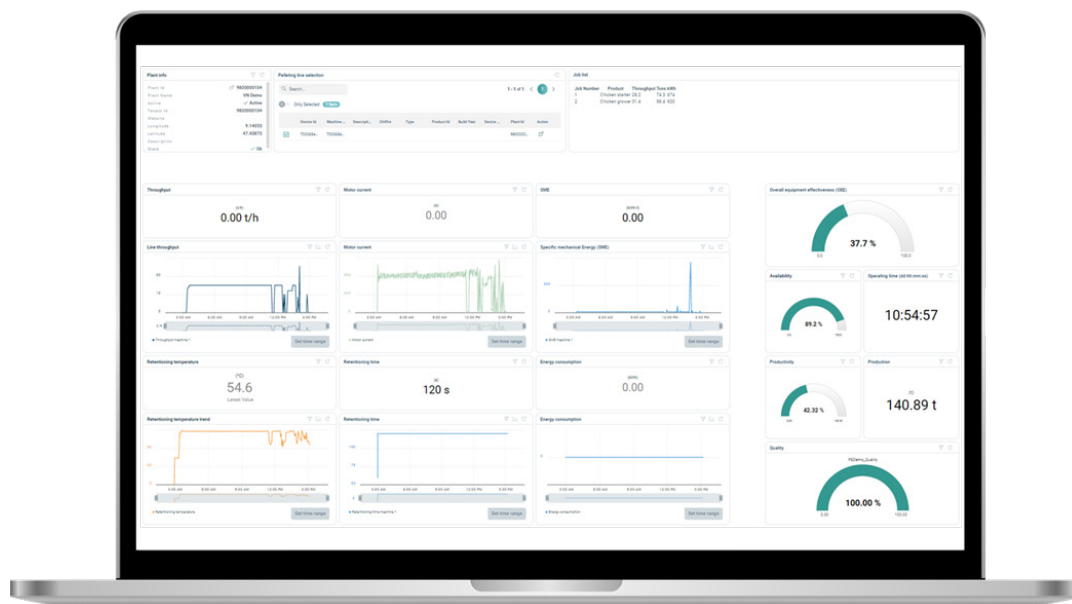

Increased plant performance: Optimized productivity through process improvements.

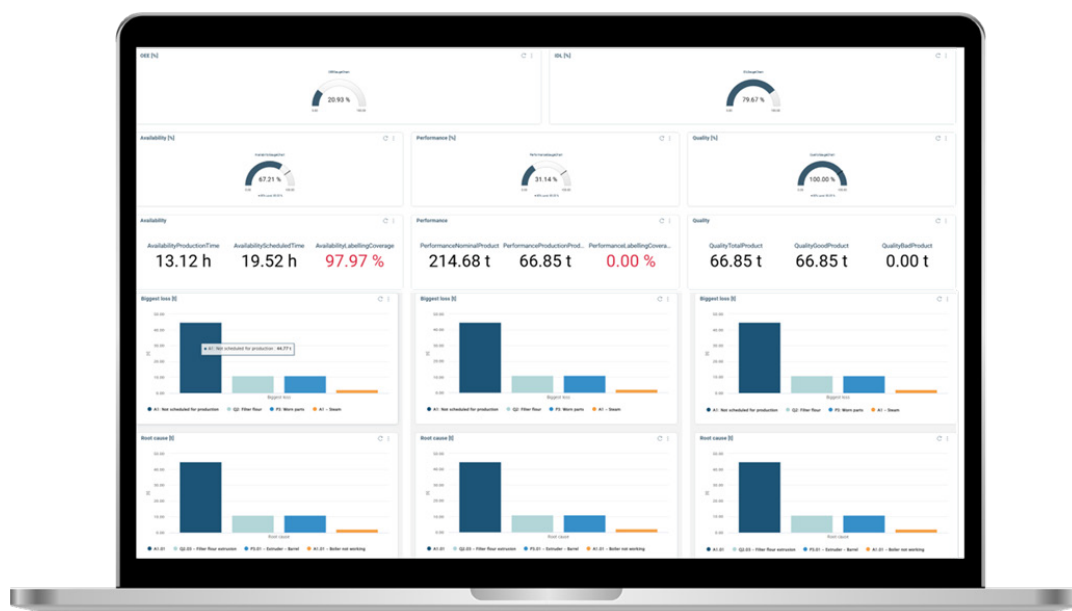

Increased availability: By eliminating unnecessary alarms, line availability can be increased.

Technical Specifications

Compatibility: Pelleting Essential works with DFCG and DFCF control systems
