Maintenance platform for plansifters MPBD

Plansifter maintenance made easy—from millers for millers

The platform makes routine maintenance on square plansifters quicker, safer, and more comfortable. Its stable, wheel-mounted design keeps it mobile and flexible.

- Compact footprint (1020×1732 mm) - fits easily into tight mill layouts
- Cleaner work area thanks to reduced dust around the sifter
- Optimized for Bühler plansifters MPAK, MPAV, MPAP, MPAH, and MPAS-122

Your benefits

Clean and safe working environment

Reduced flour dust on the sifter floor and a safer working position, significantly reduces the risk of falls

Comfort and ergonomics

Easier, more ergonomic handling of sieve stacks with less physical strain

Purpose-built solution

Tailored for plansifter maintenance, saves time and costs through faster, more efficient sieve stack handling

Includes flour collection basket and dust curtain

Work at an ergonomically ideal height

Optimal balance of safety and operator comfort
