Partnering for better outcomes

NovaBlue II / NovaWhite
sieve cleaners

Always the right sieve cleaners

Bühler's new sieve cleaners, NovaBlue II and NovaWhite, ensure clean sieve fabrics, long service life and the best finished product quality. Their new design enhances the cleaning process, maximizing the lifespan of both the sieve fabrics and the sieve cleaners.

Efficient cleaning for all mesh sizes

NovaBlue II and NovaWhite sieve cleaners enable efficient cleaning of sieve fabrics for all mesh sizes. With the same performance, they can replace all sieve cleaners, whether with natural, artificial or no bristles. The cleaners are suitable for sieving hard and soft wheat flour, semolina, as well as durum and rye.

NovaBlue II – for magnetic detection

The blue-colored material ensures optical detectability, while the ferrite additives inside NovaBlue II enable metallic and magnetic detection*. This is one of Bühler's many responses to the increasing demands for food safety.

*Magnet ≥ 10,000 Gauss (Bühler magnetic separator MMUN), metal detectors require at least a cube of 6 x 6 x 6mm.

NovaWhite – the economical option

The NovaWhite is the economical, non-magnetic version of the new cleaners. It can be used for the same applications as NovaBlue II. Both NovaWhite and NovaBlue II are made of high-quality elastomeric plastic that is resistant to temperature, fat, and enzymes.

2nd generation with improved features

The design is optimized to enhance the agility of the cleaner, resulting in better movement and significantly improved cleaning performance.
The new cleaners are equipped with a wear indicator, which reduces running costs by indicating when replacement is necessary.

The smiley symbol means all is well. No smiley? The cleaner is worn by 2/3 or more. Consider a replacement in near future.

Order information

Product	Part number
Sieve cleaner NovaBlue II	MPAK-17901-001
Sieve cleaner NovaWhite	MPAK-17945-001

Designed for all Bühler sieve frames

Both cleaners are bristle- and nub-free, resulting in an increased contact surface on the sieve fabric and higher cleaning efficiency. They are compatible with all types of Bühler sieve frame systems: Nova, NovaPur, and NovaTec, and fit sieve frame sizes of 730 x 730mm or 640 x 640mm.

NovaPur

NovaTec

Nova (wood)

Benefits

- Bristleless design for efficient cleaning and food safety
- NovaBlue II magnetic and optical detection
- NovaWhite non-magnetic and economical option
- One fits all, suitable for all mesh sizes and Nova sieve frames (Nova, NovaTec, and NovaPur)
