

CUBIC Start Hub Program

You are founder of an early-stage start-up, and you want to work out a sound use case with a leading global industrial company within three months? And get the unique chance that this will result in a pilot project? Then look no further!

For three months you will have access to our experts, infrastructure, and network to develop a use case with our support. This is a unique opportunity to meet with potential customers and decision makers, to discover their needs and lay a solid foundation for your future success.

After three months, you will have the opportunity to present your use case to a Bühler jury. If you inspire us, we will be pleased to offer you the opportunity to work with us on a pilot project. If you are not yet at the point where a pilot project can be implemented, the use case we develop together with you can show you new ways of doing things. We will be happy to support you further and open new doors for you.

Does this opportunity excite you?

Then don't miss the chance and apply today with a concrete use case. With a bit of luck, you will be invited to a pitching session in the CUBIC in Uzwil on September 7, 2021. We are looking forward to meeting you.

Click here to apply!

We offer

- Three months access to the Bühler ecosystem and knowledge (start October 1, 2021).
- Feedback from potential future customers and decision makers.
- A workspace in Bühler's CUBIC innovation center, including access to labs, and to the Makerspace with laser cutter, 3D printer, and much more.
- A mentor.
- Regular exchanges with Bühler experts.
- Support in developing a well-founded use case.
- The possibility to implement your use case as a pilot project with us.

We are looking for start-ups

- that are still in their early stages.
- that develop solutions that maintain the balance between economy, humanity, and nature.
- that agree to our [Code of Conduct](#).
