

Tension cylinder
service for your
Carat machines.

Customer Service Die Casting.

Many of the Carat die-casting machines have been in operation for years in harsh foundry conditions, producing millions of parts. An integral part of the Carat are the tension cylinders, which ensure the locking force on our two-platen solution. As they are in constant movement for every cycle, we recommend an exchange at the right time to prevent unplanned surprises.

When exchanging tension cylinders all four cylinders are replaced by high quality cylinders, which come with 5 years warranty.

Your benefits

- Save costs by avoiding unplanned downtime
- Increase efficiency – plan service and maintenance to fit your schedule
- Profit from 5 years warranty on your new tension cylinders
- Receive a complete package, including a fixed price without surprises

How does your tension cylinder service work?

Project definition
according to your
needs.

We deliver an
entire tension
cylinder set to your
site.

We exchange the
entire set on one of
your Carat
machines.

We take back the
old tension cylinders
for remanufacturing
at our site.

Together we plan
your next machine.

Our experts are happy to discuss an individual service program with you and plan the project according to your needs. Contact your responsible sales manager.
