

Pneumatic discharger MFPF

High capacity for loading of bulk trucks

Bühler's pneumatic discharger MFPF fluidizes the product by porous aeration plates. The product achieves a very high discharge rate. Capacity for loading bulk trucks.

Benefits

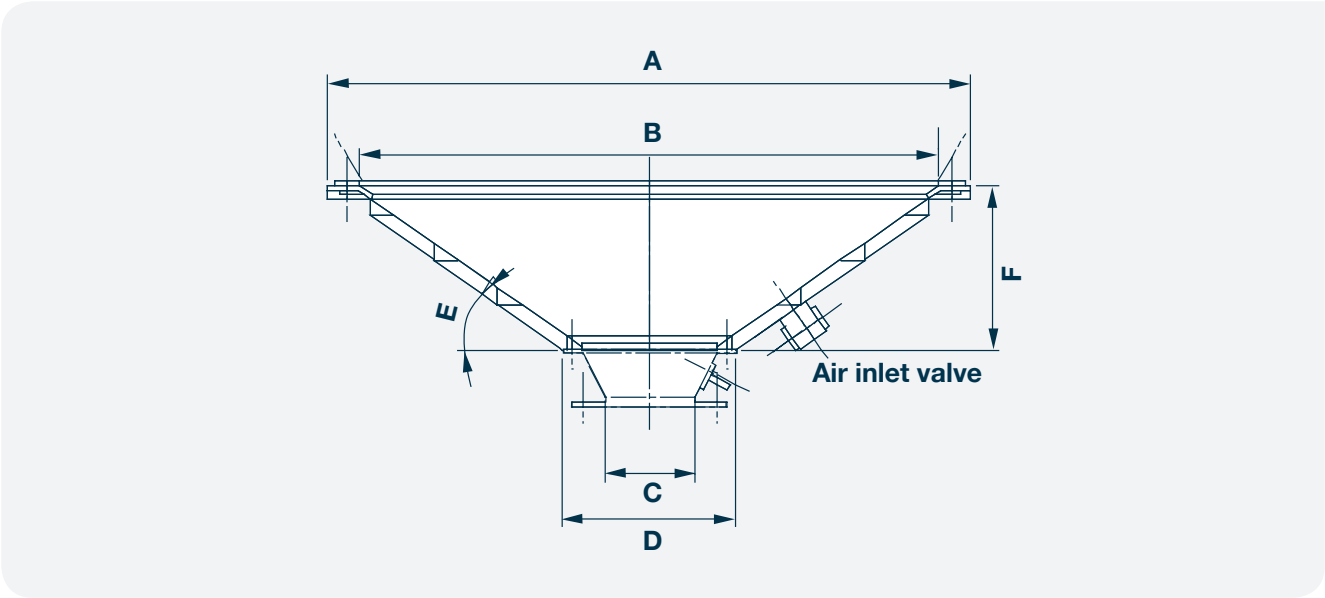

- Fluidizing of the product by porous aeration plates acted upon by compressed air
- Very high discharge rate
- Complete discharge with good sanitation
- Easy to service thanks to modular design

Operating principle

Air blows through the connection into the discharger. The air enters through the porous aeration cone and fluidizes the product. When the shut-off element is opened, the product is discharged.

High capacity for tanker loading.
 Complete discharge of bins.
