

LED retrofit for cleaning machines.

The introduction of the new retrofit is a simple, efficient step towards a sustainable future, and increases the value of your existing cleaning machine.

In a world of growing demand and limited resources, the development and use of sustainable solutions is a core principle at Bühler. Efficient energy consumption is also essential for our clients in order to ensure the success of the business in the future.

Bühler is therefore a leader in the field of cleaning machines, introducing the new LED retrofit. Instead of the neon lamps used up to now, energy-saving LED lights are used, and these have an increased lifespan of up to 40,000 hours. They attain their full brightness straight away, do not emit any UV rays and are convincing thanks to their compact design which protects against vibration damage.

We will be providing these LED lights exclusively for future lamp changes.

Benefits

- Longer lifespan
- More resistant to vibration
- Lower energy consumption

Ordering information.

Description	Chiffre & Type	Order no.	Quantity
Retrofit kit LED 120/120, 65/120	- MTSC 65/120	MTSC-10396-001	
	- MTSC 120/120		
	- MTKB 65/120		
	- MTKB 120/120		
Retrofit kit LED 65/120 E	- MTSC 65/120 E	MTSC-10397-001	
Retrofit kit LED 65/150, 120/150	- MTCD 65/150	MTCD-10110-001	
	- MTCD 120/150		
Retrofit kit LED lamp 60	- MVSG 60	MVSH-10132-001	
	- MVSH 60		
	- MVSI 60
