

## Safety upgrade for SD series three-roll mills.

Grinding & Dispersing Customer Service

This safety upgrade provides the opportunity to upgrade older machines with the latest personal safety technology.

An individual safety package is put together that reduces conversion costs to a minimum, taking into account the state of the machine.

### Benefits

- Increased operator safety
- Minimized entanglement
- Increased safety whilst cleaning process
- Achievement of actual safety standards and thus compliance of CE guidelines for machines without CE certificate

Three-roll mill SD

## Details of the safety upgrade.

4 x emergency-stop buttons and covering

Protective guard

Frequency converter brake

Adjustable cleaning mode (left switch)

Safety release

Protection bar gap 1 and 2

### The following safety modules are available:

- 4 x emergency-stop buttons
- Protective guard (top and bottom)
- Cleaning mode (reduced speed)
- Safety guard
- Safety release cord
- Two-hand mode
- Splash protection

- Frequency converter brake  
(machine stops after two seconds)
- Protection bar gap 1 and 2

The combination of these various modules creates a user-specific complete package in terms of control, that increases the safety of your machine operation. Depending on chosen safety measurements, CE certificate can also be granted for older machines without CE mark. We will be pleased to advise you.
